Multifunctional Printer

High speed document
communication throughout
your office

Multifunctional.

Productive printing.

iR5055N / iR5065N / iR5075N

Document communication with real power

Canon's iR5055N, iR5065N and iR5075N are a range of high-end multifunctional printers that enhance the way you create, share and distribute documents throughout your organisation. User-friendly and designed to maximise productivity, each printer can be equipped with an impressive range of finishing options that give communication an added edge. A range of management facilities ensure cost control and security stay high on your agenda.

Powered for busy workloads.

Keep information secure.

Achieve the highest productivity

Free up office space by replacing numerous separate devices, with one that outperforms them all. With the iR5055N, iR5065N and iR5075N you can print, copy, fax, scan or send documents using a single, multifunctional device that processes numerous jobs simultaneously. The benefits include:

- High-speed printing performance up to 75ppm
- Enhanced print quality
- One-pass duplex system, almost double the speed of conventional scanning, enabling 100 impressions per minute.
- Professional finishing capabilities including C folding, ideal for mailshots
Z folding, ideal for large excel sheets

Protect your assets

Information is a key business asset and Canon helps you keep it secure via a range of security solutions:

Document and Hardware Security

To prevent unauthorised access to the iR5055N, iR5065N and iR5075N a variety of user authentication options is available, these include:

- Passwords
- Users' network log-in procedure
- User ID cards
- Fingerprint recognition

The multifunctional printer that does everything you need

In business it's great when you can really depend on someone to get the job done. That's the way to think about the iR5055N, iR5065N, and iR5075N. One powerful MFP, it allows you to print, copy, fax, scan, and send information easily and quickly, with the quality needed to make your document communication really stand out.

Deadline-beating performance

The iR5075N prints and copies at a super-quick 75 pages per minute making it ideal for busy departments producing significant

75 pages
per minute

quantities of documents or as the heart of centralised production facilities in large organisations.

The iR5065N and iR5055N are powerful devices running at 65 and 55 pages per minute respectively. Each model comes network ready. Printing is carried out using industry standard PCL or Canon's unique UFR II for enhanced network processing speeds. Additionally, emulated and true Post Script options are available if required.

A simple-to-use interface means sophisticated print jobs can be undertaken from users' desktops. A large colour touch screen makes operation at the device equally simple.

Hole Punched

Saddle Stitched Booklet

Z Fold

C Fold

A3 Landscape Hole Punched

High quality printing

High quality document communication becomes the norm using the iR5055N, iR5065N and iR5075N with crisp, clear prints at a superb 1,200 dpi. You can finish documents with the type of professional finish that you might not expect possible without sending to a local print shop. Documents can be 'Z' folded or even 'C' folded, giving a raft of different ways to present your work in a way that will get them, and you, noticed. A document insertion device allows you to insert heavier stocks up to 256 gsm- perhaps coloured dividers produced on another device - into your workflow for added professionalism. Impactful booklets are easy to create, as well as hole punched and stapled reports, and all using a variety of media types and sizes.

Superb quality

Add Canon's iWPM software and add further professionalism. When you want to create a report combining information from different files - such as Word or Excel - normally you need to print them first and then manually collate, which is time consuming. iWPM however lets you carry out the collation quickly and electronically at your desktop, prior to printing a completed version.

Quick and effective communication

Each device incorporates Canon's new "one-pass" duplex scanner which allows document scanning at an incredible 100 impressions per minute. This allows you to scan large documents via the feeder and dispatch them as PDFs using Canon's i-Send to locations such as network folders, email addresses and mailboxes. They can even be encrypted too for added peace of mind.

Mailbox

Added convenience with mailboxes

The iR5055N, iR5065N and iR5075N incorporate mailboxes for added versatility and confidentiality. Mailboxes act as secure storage at the device for all documents, and can be established for individuals and groups of users. Any document can be scanned, sent to, or printed directly from a mailbox at your convenience - handy if you don't want a confidential report lying around before you have a chance to retrieve it. You can also preview documents in your mailbox at the device before printing.

iW Publishing Manager

Instant communication.

Software for added value.

A solution that matches your needs and budget constraints

Three powerful printers and a number of different configuration options means there's a solution that fits your needs now and that can grow as your business grows in the future.

Whatever you need.

For heavy workloads.

- 1** Saddle finisher AD2 – optional
- 2** Hole puncher – optional
- 3** Insertion / Folding unit – optional
- 4** One Pass Duplex Scanner/ Document feeder (100 sheets)- Standard
- 5** Advanced environmental approach/Future proof
- 6** Standard Paper cassettes (2 x 1500 sheets)
- 7** Standard Paper cassettes (2 x 550 sheets)
- 8** Paper deck A4/A3 (3500 sheets) – optional*

* Only one paperdeck option can be configured at any one time.

1 Professional finishing

To create the most professional-looking documents, turn to the Saddle Finisher AD2. With it you can produce automatically folded 60 page booklets, using 15 sheets with no more than a few simple mouse clicks – all from the comfort of your desktop. It's even possible to create booklets up to an impressive A4 in size. Add Canon's iWPM, and you can combine information from different sources to create business reports and detailed project plans.

2 Hole Puncher

The hole puncher provides 2 or 4 holes.

3 Insertion/Folding unit

The document inserter allows you to insert pre-printed sheets of up to 256 gsm from additional sources into your finished documents as well as providing a variety of folding options. You can 'Z' fold A3, A4R media and 'C' fold A4R.

4 One Pass Duplex Scanner/Document Feeder

A 100 sheet document feeder employs single pass duplexing allowing images to be scanned at 100 impressions per minute and accommodates different sized pages. Using the image reader and Canon's Universal Send feature enables you to scan documents and send them instantly to email addresses, mailboxes and network folders.

5 Advanced environmental Approach/Future Proof

The device adheres to the strictest environmental standards such as RoHS, which restricts the use of hazardous substances.

Using MEAP (Multifunctional Embedded Application Platform), Canon's device-embedded Java based application platform, enables new and customised software to be incorporated directly within your device. This way your investment keeps pace with the very latest in office communication technology.

Stand-by power consumption: 1w

**6 7 8 Expansive paper supply**

Combine all paper sources for a maximum total of 7,650 sheets providing huge versatility from 6 different sources. The optional paperdeck allows you to configure a variety of paper sizes to cope with heavy workloads up to A3.
